Project experience _____

Organization : **Cognizant Technology Solutions**

Designation : CSD Trainee

Domain : Java FSE Angular

Location : Chennai Sipcot

Project 1: Main Project

Title : Car Rental System

Project Description:

A full stack application wherein a customer can book the desired car from the given listing of cars in the application for the required number of hours. The admin will approve or reject the request to book the car. The front end was developed using Angular whereas the backend was developed using Spring Boot. MySQL Database was used to store the listings and bookings history.
